

# Interplanetary Coin (IPC) — Whitepaper

Version 1.0 | April 2025

## Introduction

Interplanetary Coin (IPC) is a decentralized cryptocurrency designed to power financial systems both on Earth and beyond. Rooted in family, legacy, and innovation, IPC is a digital asset crafted by a founder focused on equity, transparency, and the long-term prosperity of the global and interplanetary community.

## Mission

To build a currency that supports humanity's next giant leap — whether across borders or across planets.

## Founder's Reserve

A total of **400–500 million IPC tokens** are reserved for the founding family, distributed among the founder, spouse, and children. These tokens are held in secure wallets and will be released gradually to support growth, sustainability, and legacy building.

## Tokenomics

- **Total Supply:** 1,000,000,000 IPC
- **Liquidity:** 20M IPC seeded to the initial liquidity pool
- **Additional Strategic Pools:** In planning phases
- **Community & Treasury:** Remaining tokens to be distributed via claim pages, gift wallets, and structured public pools

## Smart Contracts

IPC is deployed on Ethereum via verified smart contracts, including custom liquidity pool management and token swap logic. The initial pool is set up for controlled scarcity, with tools for transparency and tracking via SushiSwap and DEXTools.

## Visibility & Market Access

- **Live DEX Listing:** [SushiSwap](#)
- **Tracking & Analytics:** [DEXTools](#)
- **Listings in Progress:** CoinMarketCap (CMC) and CoinGecko (CG)
- **Official Domain:** [interplanetarycoin.cash](https://interplanetarycoin.cash)

## Founder Intent & Legacy

This project is designed as a generational store of value and innovation. The founder's reserve is intended to be a long-term symbol of stewardship rather than control. IPC is both a family vision and a global opportunity.
